THIRD PARTY INSPECTION REPORT

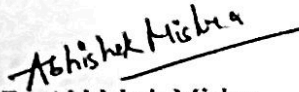

In reference to your letter number NIL dated 08/10/2021 regarding checking of stability of Greenberry World School building.

The inspection of administrative building & primary building in Greenberry World School Lucknow (U.P) was conducted on dated 13/10/2021 in presence of officials from Greenberry World School.

Observations:

1. Rebound hammer test has been carried out to assess the stability of the existing administrative building & primary building at Greenberry World School.
2. Compressive strength of the structural components (Beams, Columns etc.) of administrative building & primary building was found to be more than 25 N/mm^2 which is as per the drawings provided by the client.

Overall construction quality was found satisfactory and structure is found safe as per the codes of BIS.
